# GOSWAMI ADITYAGIRI

goswamiaaditya61@gmail.com | www.linkedin.com/in/adityagiri61 | https://github.com/Aaditya0411

## MERN STACK DEVELOPER

## EDUCATION

**PARUL UNIVERSITY**                                                Gujarat , India

Bachelor of Technology in Computer                    Cumulative GPA: 8/10.0
Science & Engineering                                              (Expected Aug 2028)

## SKILLS

- **Frontend** :  HTML5, CSS3, JavaScript, React.js
- **Backend & Database** :  Node.js, Express.js, MongoDB, H2 Database, Kafka
- **Frontend & Design** :  React.js, Responsive Web Design, UI/UX Principles
- **Cloud & Tools** :  AWS(Beginner), REST API, Git, GitHub, Cloudinary , Render
- **Languages** : Java (Data Structures & Algorithms), JavaScript, HTML5, CSS3

## EXPERIENCE

**Software Engineering Virtual Experience | JPMorgan**                *Jan 2026*
**Chase & Co. (via Forage)**

- Completed a practical job simulation involving backend engineering tasks.
- Built and integrated **REST API Controllers** and handled **Kafka Integration** for data streaming.
- Managed in-memory databases using **H2 Integration** and performed end-to-end **REST API Integration.**
- Followed industry-standard project setup and modular architecture practices.

**Frontend Developer (Project-Based) | Independent**                *2025 – Present*
**Developer**

- Developed mobile-first web applications using **React.js** and **JavaScript**, focusing on performance and scalability.
- Integrated **REST APIs** and managed complex state logic to deliver seamless user experiences.
- Utilized **Git/GitHub** for version control while implementing modern UI/UX design principles.

## ACADEMIC PROJECTS

**BnBreeze – Full Stack Web Application**                          Live Link , Github

- **Tech Stack:** HTML, CSS, JavaScript, EJS, Node.js, Express.js, MongoDB, Cloudinary.
- Developed a full-stack web application with secure user authentication and authorization..
- Implemented property listing functionalities including creation, editing, deletion, and reviews.
- Integrated image uploads via **Cloudinary** and location services using **MapTiler**.
- Applied modular routing, middleware, and server-side validation for a clean, scalable architecture.

### SoundWave – Frontend Web Application                Live Link , Github

- **Tech Stack:** HTML, CSS, JavaScript
- Designed and developed a fully responsive music-themed web application.
- Focused on modern UI/UX design, incorporating smooth animations and layout consistency.
- Strengthened core JavaScript logic and advanced CSS styling techniques.

## ACHIEVEMENTS & INTERESTS

- **Problem Solving :** Solved 150+ DSA challenges in Java on LeetCode/HackerRank.
- **Learning** : Currently exploring System Design and Cloud Architecture (AWS)
