PROFESSIONAL SUMMARY

Motivated B.Tech Computer Science student at Parul University with a strong foundation in Data Structures & Algorithms, Full-Stack Web Development, and Blockchain Development. Skilled in Java, JavaScript, React, Node.js, Express.js, MongoDB, Solidity, and Foundry, with hands-on experience building web and decentralized applications. Passionate about writing clean, scalable code, solving real-world problems, and continuously learning modern software engineering technologies.

EDUCATION

B.Tech Computer Science Engineering Parul University, Vadodara	2024-2028 Current CGPA: 7.91
XII (GSHSEB) Shree Swami Vivekanand Vidyalaya-3, Vadodara	2024 Percentage : 65.38%

WORK EXPERIENCE

Software Engineering Virtual Experience JPMorgan Chase & Co. (via Forage)	Jan 2026 – Jan 2026 Remote
- Built and integrated REST API Controllers enabling end-to-end data flow across backend services - Implemented Kafka Integration for real-time data streaming in a simulated production environment - Managed in-memory H2 Database and performed full REST API Integration following modular architecture practices - Applied industry-standard modular architecture practices ensuring clean, maintainable, and scalable code - Followed Agile-style project setup completing all simulation tasks within specified deadlines	
Mern-Stack Developer (Project-Based) Independent Developer	2024 – Present Vadodara, India
- Developing mobile-first web applications using React.js and JavaScript focusing on performance and scalability - Integrating REST APIs and managing complex state logic to deliver seamless user experiences across devices - Utilizing Git/GitHub for version control across 24+ repositories maintaining consistent commit history - Applying modern UI/UX design principles to build responsive, accessible, and visually consistent interfaces - Collaborating on open-source style projects while continuously improving problem-solving and development skills	

PROJECTS

BnBreeze Node.js, Express.js, MongoDB, Passport.js, Cloudinary	Live Link , Github
- Built a full-stack property listing platform inspired by Airbnb with complete CRUD for listings and reviews - Implemented user authentication and authorization using Passport.js with session management - Architected the app using MVC pattern with centralized error handling and Joi-based validation - Designed RESTful API routes with Express.js, custom middleware for authorization checks, and Connect-Flash for user notifications

Personal Portfolio | React, TypeScript, Vite, Tailwind CSS, GSAP

[Live Link](#) , [Github](#)

- Designed and deployed a responsive personal portfolio with smooth GSAP animations, live at Vercel
- Built with a clean component-based architecture using React + TypeScript for type safety

Lottery Smart Contract | Solidity, Ethereum, Remix IDE

[Github](#)

- Developed a fully decentralized lottery dApp on Ethereum where users enter by sending exactly 1 ETH to the contract
- Implemented role-based access control so only the contract manager can trigger winner selection
- Covered core Solidity concepts including payable functions, address arrays, constructors, and Ether transfers

TECHNICAL SKILLS

Languages | JavaScript, Java, HTML5, CSS3, Solidity

Frameworks | React.js, Express.js, Node.js, Tailwind CSS, EJS

Developer Tools | Git, GitHub, VS Code, Render, Vercel, Remix IDE, Cloudinary

Libraries | Mongoose, Passport.js, GSAP, Bootstrap

Databases | MongoDB, H2 Database

Exploring | AWS, Kafka, System Design

CERTIFICATIONS & ACHIEVEMENTS

- Completed Software Engineering Virtual Experience Program by JPMorgan Chase & Co. (Forage)
- Built and deployed multiple full-stack and blockchain projects using the MERN stack, Solidity, and Foundry.
- Maintained 24+ GitHub repositories showcasing web development, blockchain, and programming projects.
- Actively learning Data Structures & Algorithms and Blockchain Development with hands-on project implementation.
- Solved 200+ DSA problems on LeetCode.
- Open-source contributor with accepted pull requests.
